

Q: Are the costophrenic angles preserved?

GT: Yes

huatuoogpt-vision-7b: Yes, the costophrenic angles are preserved in this chest X-ray image. The costophrenic angles are the areas where the diaphragm meets the ribs and lungs, and their preservation indicates that there is no pleural effusion or other abnormal fluid accumulation in the pleural spaces.

huatuoogpt-vision-7b + DPO : No

huatuoogpt-vision-7b + FiRe-MPO: Yes, the costophrenic angles appear to be preserved in this chest X-ray image. The costophrenic angles are the areas where the diaphragm meets the ribs and lungs, and their preservation is an important finding that can help rule out conditions like pleural effusions or other abnormalities in these regions.
